

As a truck driver, I use Instant Traffic and Weather Reports on XM Radio to plan my routes. This information is extremely important to avoid congestion, accidents, construction and bad weather. As a SAFETY ISSUE, I cannot be playing with the radio knobs trying to find out this information every time I come into a different city. Also, the local stations, do NOT have this valuable information on a constant and continual basis. By the time they play the music, advertise for their sponsors, and the general chit chat, it's too late. I need this information BEFORE I ever get within their reception area, not after I'm already stuck in whatever mess is there---XM Radio would already have told me about any problems long before I ever got there.

XM Instant Traffic and Weather reports are a valuable tool for everyone!!!!!!  
I depend on my XM.....My livelihood depends on accurate and fast information and I always get it with my XM Radio!!
